

Colorize The Photo Just Like Adding

-The Result May Something Like This. It Depends On You -

Before

After

Let's Start

1. Add *Hue saturation* layer over the background.
2. Check **Colorize** in Hue Saturation Properties.
3. Change the **blend Mode** from Normal to **Soft Light** and then **slide the slider**.

Note:

*If any object is being dark in that photo then:

1. Select the mask of Hue Saturation layer.
2. Take the brush and make sure foreground color is black and then simply brush on the object which looks darker.

*If any object looks brighter in that photo then:

1. Simply open the mask properties and then decrease the density.
