Create Multi Colored Eye

-The Result May Something Like This. It Depends On You -

Before   **After**

Let's Start

1. Open Photo in Photoshop.
2. Create a 'Curves' adjustment layer and take the line little up from Curves properties box.
3. Then, select the mask and press CTRL+I and take a brush, make sure foreground color is white.
4. Then Paint on the Eye then create a 'Hue Saturation Layer' and check 'Colorize' Option.
5. Choose whatever color you like and increase the 'Saturation' and click on Mask and Press CTRL+I.
6. Take a brush and make sure foreground color is White and then Just Paint on the Eye.

7. Now create a one more New 'Hue Saturation' Layer check the colorize option and choose any color you like, increase Saturation.
8. Select Mask and Press CTRL+I then take a brush and make sure foreground color is white and then paint on the middle of the eye.
9. Then you can change color or play with Saturation.
